

SanPly3 Flexible Wood Veneer

Jacaranda SanPly3, the finest "AA" quality face-grade veneer, selected for figure and color consistency.

The appearance and appeal of wood figure and color has always been high on the desirability list for the woodworking industry. Now there is SanPly3, real wood veneer that eliminates application problems. The finest "AA" quality face-grade veneers, selected for figure and color consistency, are laminated to a unique dual-layer backing consisting of a no bleed-thru fiber and paper. This composition allows for unsurpassed ability to conform to curved surfaces without splitting, crimping or bubbling - characteristics that have made SanPly3 widely used in the custom audio speaker, custom casework and furniture industries.

Featuring advantages not available with ordinary wood veneer:

- ♦ Consistent thickness - no sanding of joint edges required.
- ♦ Sequence Matched: Color and figure consistency from one sheet to the next significantly enhances the natural beauty of real wood veneer. Automatically sequenced matched runs of 20 sheets with some species up to 80.
- ♦ Quality: Carefully selected face veneers are matched to produce a durable and artistic flexible product of "AA" grade.
- ♦ Pre-Sanded: Pre-sanding to 280 grit is done at the factory and is shipped ready to finish.
- ♦ Convenient Sheet Sizes: Standard 4' x 8' sheets are stocked or custom sizes can be ordered.
- ♦ Species: Over 80 species available, as well as a wide variety of popular exotic woods, please call McKillican for information.
- ♦ Variety of Figure & Cut: Cuts include plain and rotary sliced, rift and quarter cut, and the very desirable rare burl figures.
- ♦ Application: Can be applied by most processes including hot or cold molded press.
- ♦ Shipping: Standard sheets can be conveniently shipped by UPS.

Jacaranda, Inc.

Please contact the McKillican location nearest you for wood veneer accessories such as; rollers, glue, hot melt and trimmers.

Wood Veneer & Edgebanding Program

Woodtrim® Edgetape

Non-Glued, Automatic, Fleece Backed 7/8" x 500' Rolls
Unfinished & Pre-Finished

Woodtrim® is a genuine wood edgbanding. Fleece backed Woodtrim® is the most universally used and most cost efficient wood edgbanding. This is the standard wood edgbanding used on automatic edgbanders. Woodtrim® is available in Unfinished or Pre-Finished material. The Pre-Finished Woodtrim® is UV cured and is the perfect solution for pre-finished plywood panels, flatline finishing systems, repairs in the field and for those concerned with VOC emissions. The 7/8" width is our standard stocking width in both Unfinished & Pre-Finished Woodtrim®, however, upon special quotation it is also available in virtually endless combinations of different widths, species and thicknesses.

Woodtrim® Edgetape

Unfinished: Non-Glued Automatic
Fleece Backed 7/8" x 500' Rolls

Available for immediate shipment:

Species	McKillican Item#
♦ ALDER	3854058
♦ BIRCH, WHITE	3855575
♦ CHERRY	3855510
♦ HICKORY	3855520

Woodtrim® Edgetape

Pre-Glued, Fleece Backed, 13/16" x 250' Rolls: Unfinished

The Pre-Glued Woodtrim® is a genuine wood edgbanding. This fleece backed Woodtrim® comes Pre-Glued (with a hot melt glue applied to the backer) for use on a tabletop edgbander or applied by hand with an iron. The 13/16" width is our standard stocking width, however, upon special quotation it is also available in virtually endless combinations of different widths, species and thicknesses.

Flexwood® Sheet Veneer

Flexwood® 4' x 8' Sheet Veneer, 10 mil Backed, Unfinished

Flexwood® is the original flexible wood veneer sheet. Since its development in 1929, Flexwood® has set the standard by which other veneers are measured. Yes, it's real wood! Select wood veneers are permanently bonded under heat and pressure to a resin saturated backer sheet. This backer allows flexibility and acts as a barrier to prevent adhesives and finishes from penetrating. Flexwood® is book matched and sheet matched. Sequence matching and other types of matches are available by quotation. Also, the 4' x 8', 10 mil backed is our standard stocking product, however, upon special quotation it is also available in virtually endless combinations of different sizes (eg: 4' x 10') and thicknesses (eg: 20 mil backed) as well as in Pre-Finished and Pre-Glued.

Flexwood® WOW™ Wood Over Wood™ Laminate

4' x 8' WOW™, 100% Surface Sanded

Wood Over Wood™ laminate is composed of two wood veneer faces permanently bonded with the grain of the face running perpendicular to the grain of the back. The result is a dimensionally stable product which minimizes the wood veneer's natural tendency to expand and contract across the grain. In addition, this unique construction enables the product to be rolled and shipped in 4 foot tall box. WOW! will be your reaction when you use Flexwood® Wood Over Wood™ Laminate. If you have ever had problems laminating paper, foil, or phenolic backed veneers, we have manufactured a solution specifically for you. WOW™ offers you:

- No Bubbling
- No Checking & Cracking
- No Phenolic or Foil Backer Lines
- No 8' Shipping Boxes
- 5' Wide Sheets Available

Flexwood® 4' x 8' WOW™ Laminate,
Unfinished
