

McKILLICAN

OCTOBER 2009

Introducing.....Teragren® Environmentally Smart Bamboo Panels, Veneer + Countertops!

McKillican is pleased to announce the addition of Teragren's furniture-grade bamboo panels, veneer and countertop/table tops!

Teragren® 4' x 8' Traditional + 4' x 6' Strand Bamboo Panels

Teragren bamboo panels are made from Optimum 5.5® Moso bamboo harvested sustainably at 5.5 to 6 years in the Zhejiang Province of China. All panels are furniture-grade (S4S), machine nicely, finish cleanly and won't harm the work or home environment because the manufacturing adhesives are either formaldehyde-free (select products now in stock) or emit less formaldehyde than allowed by U.S. OSHA, European E0, CARB Phase 1 and Phase 2 and Japanese JIS/JAS (F****) emissions standards. Contribute to LEED Credits MR6 and IEQ 4.4.

Teragren's *Scientific Certification Systems Indoor Advantage™ Gold-certified* Traditional and Strand panels are of the highest air quality rating. The IAG certification complies with the California Special Environmental Requirements Specification 01350, which is designed to ensure health through good indoor air quality and is also the United States' most stringent indoor air quality standard. These products conform to the Collaborative for High Performance Schools (CHPS) EQ 2.2 and CA Section 01350 Classroom Scenario and are Indoor Air Quality certified (Registration SCS.IAQ-01879).

SCS IAG-certified panel products are currently available in stateside inventory for immediate shipment.

Teragren®
FINE BAMBOO FLOORING, PANELS & VENEER

McKILLICAN

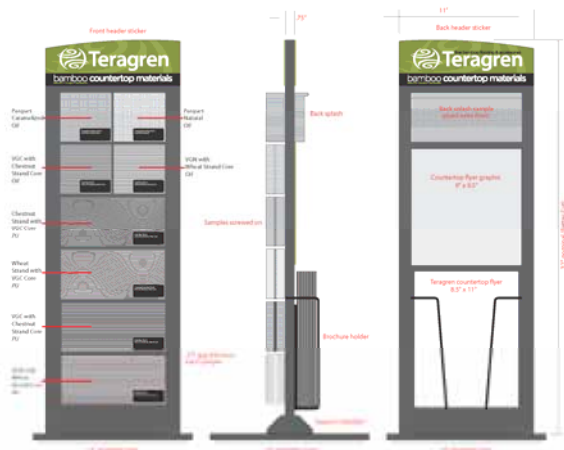

Teragren Traditional Bamboo Veneer + Edge Banding

Teragren Traditional bamboo veneer offers the custom woodworker another fine material to be used in cabinetry, furniture, interior paneling, countertops and many more interior applications where hardwood would traditionally be used. High-quality paper fleece backed 1/42" and 2-ply wood-on-wood veneer, are oversized for ease of lay-up. Teragren bamboo edge banding for the finishing touch. 1/42" and 1/8" bamboo veneer are also ideal for use in radius applications.

Teragren® Bamboo Countertops/Table Tops

Teragren's bamboo countertops are a beautiful and durable alternative to traditional hardwoods for counters, kitchen islands and table tops. Manufactured to exacting standards for quality and environmental safety, these furniture-grade products are made with rapidly renewable Optimum 5.5® Moso bamboo, a naturally bacteria-resistant material. Unfinished, mineral oil/beeswax and polyurethane finish options.

- Parquet butcher block (Natural + Caramelized)
- Strand (Chestnut and Wheat)
- Traditional (Vertical Grain Natural + Caramelized)
