

# PRE-FINISHED HARDWOOD PLYWOOD

*quality wood products from start to finish*

UV PROPLY  
ULTRAPLY

**ROSEBURG**  
FOREST PRODUCTS

## PRE-FINISHED HARDWOOD

We all know that panel finishing can be costly and time consuming for the end-user.

Depending on your location, state and local emission regulations can prohibit certain finishing

techniques required to satisfy your customer needs. That's why we created a full line of hardwood plywood panels that are finished with clear UV-cured topcoat for beauty and durability.

**UV-ProPly** is Roseburg's superior quality hardwood plywood coated with a protective UV clear finish on the face. This finish can be applied to one or two sides, depending on your needs.

**UltraPly** is Roseburg's finest hardwood plywood with the back finished in melamine, vinyl or white UV topcoat. It is available with a pre-finished UV clear topcoat applied to the face. UltraPly combines the beauty of natural hardwood with the durability and economy of a protective finish. Ultraply can be specified with any one of the most popular hardwood veneers on Ultrablend™ particleboard.

### PRODUCT FEATURES

UV clear finish on one or two sides

Excellent panel construction

Broad selection of sizes, thicknesses, species, cores and grades

Melamine, vinyl or white UV pre-finished back

All particleboard core is SCS environmentally certified, FSC certified hardwood plywood panel available

Economical

Excellent machinability

Meets ANSI and HPVA quality standards

### CUSTOMER BENEFITS

No on-site spray finishing and drying

Strong and stable end-use product

Manufacturing flexibility, increased end-use opportunities

Most cost-effective panel for your money

Ensures Roseburg practices good environmental stewardship

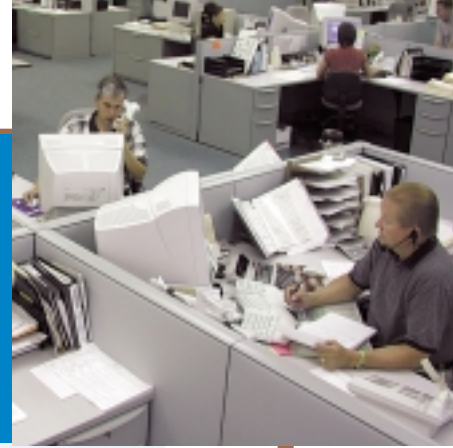

Improved bottomline

Improved manufacturing efficiency

Assurance of product quality

INTEGRATED MANUFACTURING, WIDE VARIETY OF WOOD PRODUCTS, AND NEARLY 800,000 ACRES OF OWNED FORESTLANDS ARE SIGNATURE TRADEMARKS THAT MAKE ROSEBURG AN EXCELLENT SUPPLIER. THESE ARE ASSETS THAT WILL SUPPORT YOU AND YOUR STRATEGIC GROWTH PLANS WELL INTO THE 21ST CENTURY.

## CUSTOMER & TECHNICAL SERVICES

A comprehensive manufacturing, distribution and replenishment program can be developed that will ensure a consistent supply of high quality pre-finished hardwood plywood.

Roseburg Forest Product's skilled and knowledgeable sales team is highly trained to insure Roseburg meets their specific product and service requirements. Located at our largest manufacturing complex in Dillard, Oregon, they provide sales assistance, product information, order processing, scheduling and transportation services.

In addition, Territory Sales Managers (TSMs) are strategically located to serve customers throughout the United States and Canada. These trained professionals provide sales assistance, product and technical support. The TSMs work closely with their customer's sales, purchasing, manufacturing and engineering personnel to assure that Roseburg satisfies their needs.

## ENVIRONMENTAL STEWARDSHIP

We are proud to have over 300,000 acres of company owned timberland certified by one of the world's most accepted third-party certification organizations, FSC (Forest Stewardship Council). We recognize that the global demand for wood products is growing and we are balancing that need with the harvesting and processing of natural resources.

Roseburg holds itself, its vendors and its employees to high environmental stewardship expectations and is committed to an excellent forest stewardship program that includes: sustainable forest management; protecting biodiversity; setting and achieving efficient goals; tracking and improving performance; and being a good industry role model. To assure

accountability, Roseburg utilizes third-party audits to validate our commitment to environmentally sound forest management practices.

## TECHNICAL INFORMATION

### UV ProPly

UV clear pre-finished hardwood plywood

#### AVAILABILITY:

Thickness: 5.2mm, 1/4", 3/8", 1/2", 5/8", 3/4"  
Lengths: 8' & 10'  
Widths: 4'

One or two sides on a variety of cores:  
veneer, MDF, UltraBlend™ and composite

#### FEATURES

- Extremely durable
- Consistent quality
- Diverse selection of species
- Low to high gloss levels
